

# How to install the FeralScan App on an Apple device

## Installing the App is easy

### 1. Select 'App Store'

Open the App Store App on your Apple device.

### 2. Install FeralScan

Type FeralScan into the search bar and select the FeralScan icon from the list then tap the cloud-shaped symbol to install.

### 3. Locate the App

Once installed, open the FeralScan App on your device to start recording information.

#### Helpful hints:

- Please ensure you are in mobile reception or internet range when installing the App.
- You may be asked to enter your Apple password during installation.
- If you already have the FeralScan App downloaded, please click 'update' rather than 'install'.
- Once installed on your device, the App can be used to record pest animal information in remote areas. Please Login (or register) before use.
