

What is FeralScan?

Pest animal mapping resource for communities.

Record pest animals in your local area

FeralScan is a free pest animal mapping resource for farmers, community-groups, local government, NRM groups, and the Australian public. It hosts over 30,000 community records of pest species, to help with local control of pest threats.

Website - www.feralscan.org.au

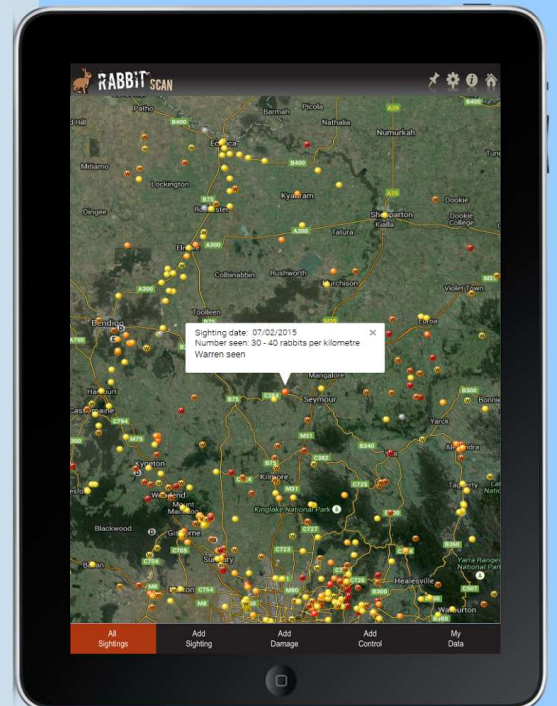

- Free resource for mapping pest animals
- Record sightings, sign, damage and control actions
- Print a pest map for your local area
- Work with your neighbours to target problem hotspots
- Keep local authorities informed about pest problems
- Promote other people to record pest activity

To register your sightings, or receive newsletters and pest warnings, please visit the website feralscan.org.au or contact the FeralScan team: feralscan@feralscan.org.au

New features

1. Free Smart Phone App (Android/Apple)
2. Community facilities to help members work together
3. Receive alerts and warnings about local pest threats
